EXETER AIRPORT – AIRSPACE CHANGE PROJECT

Dear Jill,

Thank you again for your letter, a copy of which we understand you have provided to the CAA. Having successfully passed the CAP1616 Stage 1 DEFINE gateway we are of the belief that we have satisfied the requirements of the CAP1616 process in respect of developing our Design Principles through two-way engagement.

Since the gateway in October, there has been no further activity on our ACP while we waited for our board of directors to approve the next step. We are going to kick off Stage 2 towards the end of March and will write to all of our stakeholders in due course explaining where we are at and how we would like to engage with you during the design process. We hope that you will join us for further engagement workshops and help shape our ACP.

In the meantime, we understand that the CAA complaints process will progress and that both DSGC and Exeter may hear from them in due course.

Yours Sincerely

Stephen Wiltshire

Operations Director
